

INDIA ENERGY WEEK 2025

11-14 FEBRUARY, 2025 | YASHOBHOOMI, DWARKA, NEW DELHI | INDIA

India Energy Week has become a major global event for energy professionals, facilitating business deals and international networking. It connects exhibitors with key buyers from 120+ countries, showcasing advanced technologies and sustainable solutions. With 700+ exhibitors and 70,000 attendees, the event fosters innovation, strategic partnerships, and the future of energy.

RENEWABLE ENERGY ZONE

The Renewable Energy Zone at India Energy Week 2025 highlights innovative renewable energy technologies and fosters discussions and collaborations to drive India's clean energy future.

Vamanie Paramita Energy
Perfection of Energy

Introduction

Sindhuja-I is futuristic product focused on generating Green Energy by harnessing ocean waves which will help India to fulfil its net carbon neutrality goals. VP Energy plans to tap 1 MW out of Total Addressable Market of 40 GW energy potential of 7500+ KM Indian coastline, by 2030.

Mega Carbon Footprint

CO₂ emitted in Mt from Thermal Power Plants of India

Current Challenges

..with Green Energy Generation:

1. Huge Land Requirement
2. Lack of 24x7 energy generation capabilities
3. Seasonal Variation
4. Disruption of ecosystem

Our Solution

Green Energy generated by harnessing Wave Power of Ocean can help us meet our energy demands without generating Carbon Footprint.

Unique Selling Proposition

- > First Mover Advantage – Successfully tested our technology across Vishakhapatnam Coast
- > Proprietary Point Absorber Wave Energy Converter (PAWEC) Technology designed for Indian Coastal & Ocean Conditions
- > Strategic applications in Defense, Meteorology, Petroleum & other Industries.
- > Generate & Sell Carbon Credits powering Net Carbon Neutrality Mission of India

Road to Success

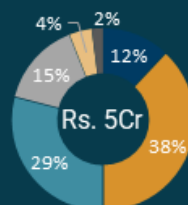

Why Wave Energy?

Energy Sources	Hydroelectric Energy	Solar Energy	Wind Energy	Hydrogen Energy	Wave Energy
Indicative PPA	Medium	Low	Medium	High	Medium
Material & Infra Cost	Medium	Low	Medium	High	Medium
Operation & Maintenance Cost	Medium	Low	Medium	High	Low
Land Requirement	Medium	High	High	Medium	Low
Impact on Ecology & Local Population	High	Medium	Medium	High	Low

Funding Requirement

- Human Resource
- Material
- Manufacturing & Assembly
- Operations
- Logistics
- Miscellaneous
